**Van Lindenberg
Trading BV**

- ✓ We supply blends of dairy ingredients
- ✓ with a high quality
- ✓ to various customers in the feed industry

Valitra®

'Blend quality in feed'

Van Lindenberg Trading BV is a medium-size international supplier to the food and cattle feed industry. High quality dairy ingredients are supplied to various customers in large volumes, but also in small consignments if required.

When the company was founded in 1997 it supplied basic raw materials to the cattle feed industry. The range was soon supplemented with semi-finished products. Van Lindenberg Trading BV now also supplies products to the food industry.

Alongside personal attention, Van Lindenberg Trading BV's strength lies in matching supply and demand. Advanced software makes it possible to create every semi-finished product as efficiently as possible, resulting in optimum value for money.

Raw materials are purchased on the international market at the right time and in the right place, partly thanks to the activities of subsidiary Van Lindenberg Trading International BV, which has an establishment in Poland.

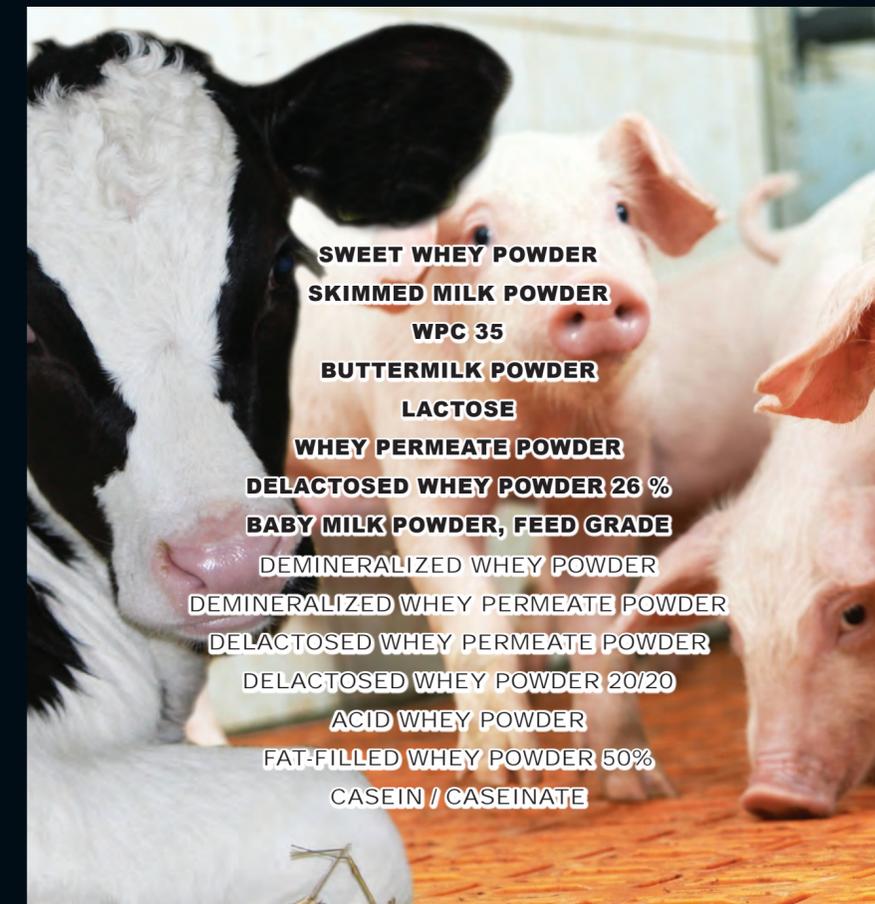

Doing business with Van Lindenberg Trading BV not only means opting for reliable high quality products, but also for minimal administrative and logistical effort. We can arrange the required documentation and shipping for you if required.

SPECIAL BLENDS:

Van Lindenberg Trading BV sources a wide range of raw materials from leading producers. Most of the raw materials listed above can be supplied in a recombined variant. To do this, we standardize and mix the raw materials to a stipulated and required specification. Naturally the products are not used and delivered until they have been checked and meet the correct criteria.
